SUMMARY

Frontend Developer with hands-on freelance experience in React.js, Next.js, and TypeScript, building real-world applications including a full-featured sales management system with 10+ business modules and an expense tracking application. Skilled in responsive, component-based UI development, React Hooks (useState, useEffect), REST API integration, authentication and role-based access control, and Firebase real-time data. Experienced collaborating with remote teams via Git/GitHub, with a strong focus on clean, accessible, and maintainable code.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Hooks (useState, useEffect), Responsive Design, Flexbox, CSS Grid, Media Queries, Bootstrap, Tailwind CSS
- **UI/UX:** Component-Based Architecture, Basic Accessibility (A11y), User-Friendly Interface Design, Light/Dark Mode, Multi-Language (Arabic/English) Support
- **APIs & Data:** REST API Integration, Axios, Authentication & Role-Based Access Control, JSON, Firebase Firestore, Firebase Authentication, Real-Time Data Handling
- **Tools & Workflow:** Git, GitHub, VS Code, Vite

PROFESSIONAL EXPERIENCE

Front-End Developer (Freelance) — Flosy Feen — Expense Management Web App | JavaScript, React (Nov 2025 – Mar 2026)

- Built 4 core screens — Home, Expenses, Budget, and Settings — for a real-world personal expense tracking web application using JavaScript and React, as part of a 4-person freelance team.
- Built the login interface with Google Sign-In (Firebase Authentication) for user access.
- Developed reusable React components and responsive layouts for consistent UI behavior across desktop and mobile browsers, collaborating via Git/GitHub.

[Live Demo](#) | [GitHub](#)

Front-End Developer (Freelance) — Sales Management System | Next.js, React, TypeScript, Tailwind CSS, REST APIs (Apr 2026 – Present)

- Developed the front-end of a full-featured sales management system with 10+ business modules, collaborating via Git with a 3-person team alongside a separate back-end developer.
- Built responsive dashboards and interfaces for KPIs, employee performance, daily reports, expenses, purchase invoices, customers, products, sales, inventory alerts, and returns.
- Implemented authentication, protected routes, role-based access control, employee permissions, and an admin panel for user management.
- Implemented Arabic/English localization, RTL support, and Light/Dark mode across the application.
- Integrated RESTful APIs and developed reusable, responsive React components optimized for desktop, tablet, and mobile.

SELECTED PROJECTS

Sales Management System — React, Next.js, TypeScript (10+ modules, see Experience) — [GitHub](#)

E-commerce Website — React — [Live Demo](#)

- Built a fully responsive e-commerce application with React (Vite) and Hooks (useState, useEffect), integrating the Dummy JSON API for product listing, category filtering, and cart management with dynamic UI state updates.

Portfolio Website — React — [Live Demo](#)

- Responsive personal portfolio built with React (Vite) and CSS, with smooth navigation and interactive UI elements.

EDUCATION

Bachelor of Information Technology

Faculty of Computers and Information, Mansoura University, Egypt

Graduated: 2025

Cumulative Grade: Good

Graduation Project: Medication Management System — Rated Excellent

LANGUAGES

Arabic: Native | English: Good (Professional Working Proficiency)
